

# Mauritania – Nouakchott

## Global Youth Tobacco Survey (GYTS)

### FACT SHEET . . . . .

The Mauritania – Nouakchott GYTS includes data on prevalence of cigarette and other tobacco use as well as information on five determinants of tobacco use: access/availability and price, environmental tobacco smoke exposure (ETS), cessation, media and advertising, and school curriculum. These determinants are components Mauritania could include in a comprehensive tobacco control program.

The Mauritania – Nouakchott GYTS was a school-based survey of students in 1ere, 2eme, and 3eme Annee, conducted

in 2001. A two-stage cluster sample design was used to produce representative data for all of Nouakchott. At the first stage, schools were selected with probability proportional to enrollment size. At the second stage, classes were randomly selected and all students in selected classes were eligible to participate. The school response rate was 100%, the student response rate was 86.8%, and the overall response rate was 86.8%. A total of 2412 students participated in the Mauritania – Nouakchott GYTS.

### Prevalence

- 33.5% of students had ever smoked cigarettes (Male = 40.9%, Female = 23.9%)
- 28.5% currently use any tobacco product (Male = 34.6%, Female = 21.5%)
- 18.3% currently smoke cigarettes (Male = 25.1%, Female = 10.5%)
- 17.4% currently use other tobacco products (Male = 18.8%, Female = 15.5%)
